

PROJECT ACTIVITIES AND EVENTS

InTraRegio has carried out a series of **transnational workshops** to support the international learning process among the project regions. Five transnational workshops have been organised, one in each project region, attended by regional innovation programme makers, scientific actors and industrial transport players. Next to local participants, also stakeholders from the respective other project regions participated to the workshops in order to generate a real information flow and knowledge exchange:

• **The Forth Transnational Workshop of InTraRegio on "IT Systems for Transportation and Logistics"**, has been organised by the University of Calabria, R&D.LOG and the Gioia Tauro Port Authority on the 09 and 10 July 2014 in Campora San Giovanni, Italy. The transnational workshop focused on "how ICT could be exploited to support the establishment of efficient and effective transport systems".

• **The Fifth Transnational Workshop of InTraRegio on "Port and Sea Terminal"** took place at the Technology Park of Fuerteventura, Spain, on 19 November 2014, organised by the Canary Cluster of Transport and Logistics (CCTL). The workshop has been organised in the framework of the 'Atlantic Logistic and Transport Exhibition' (SALT 2014) that took place in Fuerteventura in the period of 19-21 November 2014. The previous edition of the exhibition, SALT 2013, has received an award for the best logistic initiative of the year in Spain. See more at: www.saltcanarias.es/salt-2014-cierra-su-quinta-edicion-con-un-importante-respaldo-internacional-tras-sumar-la-participacion-de-representantes-de-nueve-paises/

The final conference of the INTRAREGIO Project – 20 November 2014, Puerto del Rosario, Fuerteventura (Canary Islands, Spain). The conference has seen the participation of many speakers representing past EU projects regarding intermodality; they have given their contribution in the framework of the conference panels, according to the main topics of the conference agenda:

• **The present and future of intermodality:** variety of projects have been presented in addition to INTRAREGIO: COMPASS, ORIGAMI, INTERCONNECT, MAPDRIVER, SYNAPTIC, TRANSFORM, SHAPE IT, POLISUMP.

- **Presentation of the JAP and matchmaking events:** The measures of the INTRAREGIO JAP has been presented to the audience and a short matchmaking event will be then held to collect interests from the attendants in the measures presented.

- **Lessons on cluster cooperation: difficulties and benefits,** based on speakers from Technological Institute of Canary Islands, East Marmara Transport Cluster, Bioindustry Park and Bremen Cluster on Logistics.

- **International cooperation agreements:** synergies between research and international cooperation activities - the conference has been a platform to sign an International cooperation agreement. This trilateral agreement provides the basis for future cooperation between the regions of Bremen, Canary Islands and Morocco in research and innovation projects concerning transport and logistics. The first project ideas are already developed and will be implemented shortly. The project is part of the issue of sustainable short distance sea shipping, which aims to establish a maritime naval corridor between southern Morocco and Bremen via the Canary Islands. The agreement has been signed by:

- Cluster of Transport and Logistics of the Canary Islands represented by the President Javier Santana Fraga,
- LogDynamics Research Cluster at the University of Bremen represented by Professor Hans-Dietrich Haasis,
- Cluster LOGIPOLE SMD (Cluster Marocain de la Logistique et du Transport) represented by the president Yassine Rhanmouni.

This trilateral agreement provides the basis for future cooperation between the regions of Canary Islands, Bremen, and Morocco in research and innovation projects concerning transport and logistics. The first project ideas are already developed and will be implemented shortly. The project is part of the issue of sustainable short distance sea shipping, which aims to establish a maritime naval corridor between southern Morocco and Bremen via the Canary Islands.

PROJECT RESULTS

List of project deliverables available on the website - www.intraregio.eu

- D2.2 - Five regional Research Agendas
- D2.3 - Report on regional cluster policies and initiatives at regional, national, and European level
- D2.4 - Report on Comparative Analysis
- D3.1 - Report on Joint RTD Strategy & Policy Formulation Event
- D3.2 - InTraRegio Joint Action Plan
- D3.3 - Updated version of the Business Plan and Implementation of Strategy of the JAP
- D4.1 - Report on staff exchanges/ joint trainings
- D4.2 - Report on transnational workshops
- D4.3 - Report on additional mentoring for partner regions with a less-developed research profile
- D5.1 - Report on International dialogue event
- D6.1 - Dissemination & Communication plan, presentation of the running website and final dissemination plan
- D6.2 - Project leaflet
- D6.3 - Report on the project dissemination and communication activities
